

**Determine the output of the program shown below.**

```
public class CharsAndInts
{
    public static void main(String args[])
    {
        char alpha = 'A';
        char ascii = 65;
        int letter = 'd';
        char sumAplus5 = 'A' + 5;
        int sumCplus30 = 'C' + 30;

        System.out.println( "alpha = " + alpha );
        System.out.println( "ascii = " + ascii );
        System.out.println( "letter = " + letter );
        System.out.println( "(char)letter = " + (char)letter );
        System.out.println( "sumAplus5 = " + sumAplus5 );
        System.out.println( "(int)sumAplus5 = " + (int)sumAplus5 );
        System.out.println( "sumCplus30 = " + sumCplus30 );
        System.out.println( "(char)sumCplus30 = " + (char)sumCplus30 );
    }
}
```
