

```
/**
 * dominguez
 */
public class SimpleBooleanExercise
{
    public static void main( String args[] )
    {
        boolean cloudy = false;
        boolean ugly = true;
        boolean tuzzy = true;
        int a = 2;
        int b = (int)3.7;

        if(cloudy) System.out.print( "it\'s cloudy!" );
        else System.out.print( "it\'s sunny!" );

        if( tuzzy == ugly ) System.out.print( "\n\nHi Josh, just kidding!" );

        if( (a+b) == 5 )
            System.out.print( "\n\nLet's write some cool programs!" );
    }
}
```

OUTPUT

it's sunny!

Hi Josh, just kidding!

Let's write some cool programs!
